AUTHOR Hullett, Phyllis
TITLE 1981-82 Gender Equity Report: Bakersfield College.
INSTITUTION Bakersfield Coll., Calif.
PUB DATE Jun 82
NOTE 61p.
PUB TYPE Reports - Descriptive (141) -- Statistical Data (110)

EDRS PRICE MF01/PC03 Plus Postage.
DESCRIPTORS Agricultural Education; Allied Health Occupations Education; Business Education; Community Colleges; Consumer Education; Courses; Departments; *Enrollment Trends; *Females; *Males; Public Service Occupations; *Sex Fairness; Trade and Industrial Education; Two Year Colleges; *Two Year College Students; *Vocational Education

ABSTRACT

This summary of gender equity activities at Bakersfield College highlights six areas of vocational education, identifying courses that have more than 80% of one sex enrolled and examining changes in enrollments between 1980 and 1982. Introductory materials outline the purpose of gender equity activities in overcoming sex bias, stereotyping, and discrimination; provide national statistics that point to the need for expanded vocational opportunities for women; and illustrate the role of gender equity "bookkeeping" in observing changes in enrollment patterns over time. The next section identifies the six vocational education areas examined (i.e., agriculture, business, family/consumer education, health careers, industrial education, and public service) and outlines changes between 1980 and 1982 in the number of instructors, the number of classes offered, and student enrollments. The following section provides a breakdown of changes in the number of classes offered, in the number of male and female instructors, and in male and female enrollments by department. Then, tables are provided listing majors in which males and females each comprise at least 20% of the enrollments (N=106), those in which enrollments are more than 80% male (N=83), and those in which enrollments are more than 80% female (N=71). Finally, an enrollment summary is presented for each of the six vocational areas, including detailed data on enrollments by course within department. (HB)

June 1982

INTRODUCTION

The purpose of Gender Equity activities over the past several years has been to encourage educational institutions to overcome sex bias, stereotyping and discrimination. This effort was made possible by utilizing funds from the state's VEA appropriation for affirmative and corrective action programs.

The following statement and statistics from the December, 1981 Gender Equity Report to the Board of Governors of the California Community Colleges emphasize the many reasons for positively addressing equity issues.

"From the female student's perspective, the argument for equity is compelling from an economic standpoint. The following facts point to the need for expanded vocational opportunities for women:

> Full-time women workers earn approximately 60 percent of what men earn. The wage gap is attributed, in part, to occupational segregation: women working in low-paying jobs.
>
> Women's participation in the work force is expected to increase greatly during the 1980's: among women 25-54, estimates average 66 percent to over 70 percent will be working outside the home.
>
> There were over 8 million female heads of families in 1978, an increase of 54 percent in the last decade. The proportion of all families in the U.S. now headed by women is 14 percent.
>
> In California, one of every seven families was headed by a woman in 1977.
>
> Of single older women aged 45-54, 74 percent work, and of those 55-64, 61 percent work.
>
> The fastest growing segments of the labor force during the 1970's were married women with husbands present and mothers with school-age children.
>
> In 1977, wives working full-time contributed 38 percent of family income. In these families the median income was $20,722 as compared to $15,796 when the husband was the sole breadwinner.
>
> Across the U.S. there are an estimated 3 million displaced homemakers, women in their middle years (generally 35-64) who have been deprived of their traditional role by the loss of their spouse through separation, divorce, abandonment or death. Of these women, 75 percent are over 40 with an annual income of less than $5,000.

These statistics reveal that the role of women in national employment and the need of women for employment has increased substantially. Employment alternatives available to women have not increased at an equally rapid pace, however. As recently as 1970, 70 percent of women workers were clustered in three occupational areas: clerical, service, and professional or administrative. The economic effect of this narrow bank of options seems clear when one looks at women's average earnings. Nationally, in 1977, the median yearly paycheck for fully employed women was 58.9 percent that of men similarly employed. If the earnings gap between men and women is to be narrowed, then women's options must be widened. Vocational education programs are playing a key role in determining those options. "

The information included in the 1981 report list gives us many of our initial reasons for implementing a Gender Equity plan on the Bakersfield College campus.

A most important purpose of the Gender Equity program is to identify classes in the Vocational Education areas which have 80% or more of one sex enrolled.

The point of this study is to discover what changes have occured in the two years of Gender Equity "bookkeeping" on the BC campus. The attached information gives a breakdown of departments, gender of students enrolled, instructors, etc.

The following page is a general comparison and the six Vocational Education areas from 1980 to 1982. Generally, reductions in classes, students and instructors have occured in each department.

It appears that changing the 80% - 20% gender ratio in the Vocational Education areas at Bakersfield College is a very slow process. The OPTIONS program, (Opportunity Program Training Individuals for Occupational and Non-traditional career Success) has made a real effort to encourage women to look at a wide variety of occupational choices. Since most of these women are supporting themselves and their families we urge them to take a very serious look at the non-traditional career choices.

We encourage and support these women who have tremendous emotional, financial, family, and academic pressures. We can only hope that they have the courage to take meaningful steps toward successful career choices. When their decisions and choices are "non-traditional" in nature, we hope their sincere efforts and determination will be met with acceptance and understanding in each course of their choice.

Summary of six areas:
AGRICULTURE
BUSINESS
FAMILY/CONSUMER EDUCATION
HEALTH CAREERS
INDUSTRIAL EDUCATION
PUBLIC SERVICE

This study utilized two computer printouts of statistics involving the above six vocational education areas.

The two reports are dated Spring 1980 and Spring 1982. The statistical information presented, gives a general comparison of the enrollments, numbers of female/male students and instructors, etc.

A two year Gender Equity comparison of vocational Education opportunities on the Bakersfield College campus indicates that in 1982 the following trends have occured:

1. Total number of classes in the six Vocational Education areas has decreased....

   1980 611 1982 506 Total 105 Percent 17% decrease

2. Total number of instructors in the six Vocational Education areas has decreased.... Full time, part time and hourly*

   1980 238 1982 196 Total 42 Percent 17% decrease

3. Total number of male instructors in the six Vocational Education areas has decreased .... Full time, part time and hourly*

   1980 153 1982 135 Total 18 Percent 12% decrease

4. Total number of female instructors in the Vocational Education areas has decreased .... Full time, part time and hourly*

   1980 85 1982 61 Total 24 Percent 12% decrease

5. Total number of students enrolled in the Vocational Education areas has decreased .....

   1980 11,424 1982 9600 Total 1824 Percent 16% decrease

6. Total number of male students in the Vocational Education areas has decreased....

   1980 5256 1982 4070 Total 1186 Percent 23% decrease

7. Total number of female students in Vocational Education areas has decreased ....

   1980 6168 1982 5530 Total 638 Percent 10% decrease

*This includes full time staff members from other departments who teach one or two hours in a Voc. Ed. area. I.E.-Health Careers...Dental 52 Dental Anatomy. Terminology taught by John Akland from the Life Science Dept.

1982
Summary of Class/Gender Enrollments

Department	Total # of classes	Classes 80% and above Male	Classes 80% and above Female
AGRICULTURE	25	8 *1	4 *2

*Please note: 1. of the above (8) are 100% male
2. the four classes with above 80% female are:
-Ornamental Horticulture 40 (Flower Arrangement)- both classes are above 80% female
-Ornamental Horticulture 41 (Advanced Flower Arrangement)- both classes are 100% female

BUSINESS	105	5 *1	53 *2

*Please note: 1. 2 classes in Real Estate 59 are 100% male
1 class (Real Estate 64) is 100% male
1 class (Management 59) is 100% male
1 class (Business A LA) is 100% male

2. 29 of the above (53) are 100% female

FAMILY/CONSUMER EDUCATON	137	-0-	118 *

*Please note: 1. Of the above (118) 62 are 100% female

2. Of the 118 classes NO class has less than 83.3% female

HEALTH CAREERS	47	-0-	42*

* Please note: 1. 14 of the above (42) are 100% female

2. Of the 42 classes, the lowest percent is 82.6% female

Summary of Class/Gender Enrollments
1982 (Continued)

Department	Total # of classes	Classes 80% & above Male	Classes 80% and above Female
INDUSTRIAL EDUCATION	161	130*1	1*2

*Please note: 1. 83 of the 130 classes are 100% male

2. The (1) 100% female class is Auto 70 (Automotive Maintenance and Serviceing for Women)

PUBLIC SERVICES	31	11*1	-0-

*Please note: 1. 5 of the above (11) are 100% male
